100m fiber optic connection using Xiaomi Router 3

Overview

However, setting up a fiber optic connection to your router can seem daunting if you''re unfamiliar with the process.

Key Takeaways

You can use a 100-meter fiber optic cable with a Xiaomi 3 router, but it requires an Optical Network Terminal (ONT) or compatible SFP module to convert the fiber signal to Ethernet for the router. Key Considerations1. Fiber Cable Type and Length A 100-meter pre-terminated fiber optic cable, typically single-mode with LC-LC connectors, is suitable for indoor or outdoor deployment and supports high-speed connections up to 10 Gbps.

Ensure the cable is protected with anti-bend material to prevent damage during installation. 2. Router Compatibility The Xiaomi 3 router does not have a native fiber input (SFP port).

To connect fiber, you need an ONT provided by your ISP or a compatible SFP-to-Ethernet module.

The ON

T converts the optical signal into an Ethernet signal that the Xiaomi 3 router can use via its WAN port. 3.

Connection Setup

Step 1: Connect the fiber optic cable to the ONT's fiber port. Step 2: Use an Ethernet cable to connect the ONT's LAN port to the Xiaomi 3 router's WAN port. Step 3: Power on the ONT and router, then configure the router according to your ISP's requirements (PPPoE, DHCP, or static IP).

4.

Performance Considerations

A 100-meter fiber cable does not significantly degrade speed if it is single-mode or high-quality multimode (OM3/OM4) fiber. Ensure the Xiaomi 3 router supports gigabit speeds to fully utilize fiber bandwidth. For speeds above 1 Gbps, check if the router's WAN port can handle the throughput.

5.

Practical Tips

Label the fiber strands (A/B) to avoid confusion during installation. Avoid sharp bends and protect the cable from physical stress. If your ISP provides a pre-configured ONT, it is usually easier and more reliable than attempting a direct fiber-to-router connection.

By following these steps, you can successfully integrate a 100-meter fiber optic cable with your Xiaomi 3 router, achieving high-speed, low-latency internet while maintaining cable integrity and network reliability.
