

Aluminum Alloy Explosion-proof Distribution Box Housing Model

Overview

Flameproof enclosure Ex d IIB+H2 Copper-free aluminium enclosure, powder coated surface. Equipped with a specialized hinge structure which can prevent damage to the flameproof joints when opening and closing the box and greatly prolongs the service life. Aluminum alloy/carbon steel surfaces feature high-pressure electrostatic powder coating, while stainless steel surfaces have a brushed finish, ensuring corrosion resistance and aging resistance. The YXFB Explosion-Proof Aluminum Alloy Explosion-Proof Box is designed for electrical protection in hazardous and potentially explosive environments. It is engineered to reduce risks caused by circuit sparks, gas ignition, or dust exposure, while maintaining stable operation under industrial. A: The Explosion-proof wall-mounted distribution box adopts a wall-mounted design, which is flexible and convenient to install. It can be installed on walls, columns, etc. For outdoor use, rainproof cover or protective cabinet can be added. Enhance your operations with reliable, durable equipment tailored to your needs.
