Angola Fiber Optic Cable Project

Overview

The project targets 1,980 kilometers of new fiber optic cable deployment across provinces that the existing backbone either bypasses entirely or reaches only at provincial capital level, leaving municipal seats, commune headquarters, and economically significant towns without. The project targets 1,980 kilometers of new fiber optic cable deployment across provinces that the existing backbone either bypasses entirely or reaches only at provincial capital level, leaving municipal seats, commune headquarters, and economically significant towns without. Deep analysis of Angola's National Broadband Network project — 1,980 kilometers of new fiber optic deployment connecting underserved communities, route planning, contractor selection, and rollout timeline. The National Broadband Network represents Angola's most ambitious terrestrial fiber. The mobile telecommunications company UNITEL has invested 43 million US dollars in the branch of the submarine cable named 2Africa, spanning approximately 45,000 kilometers of fiber optic, announced today (Saturday) by the company's Chairman of the Board, Aguinaldo Jaime. The infrastructure will be operated by the telecom operator Unitel. Without fiber, mobile towers cannot backhaul.
