

Austrian cable tray prices and specifications

Overview

This report analyzes the Austrian plastic cable trays and ducts market and its size, structure, production, prices, and trade. Additionally, it requires minimal maintenance, reducing ongoing costs.

Key Takeaways

Cable tray supports in Austria typically range from €10 to €50 per meter, depending on material, type, and load capacity.

Pricing Overview

The cost of cable tray supports varies based on material, design, and supplier. Common materials include galvanized steel, stainless steel, aluminum, and plastic, with steel being the most cost-effective for heavy loads and aluminum or stainless steel costing more due to corrosion resistance and durability. Plastic supports are cheaper but are generally suitable only for light-duty applications.

Steel supports: €10–€30 per meter, suitable for standard industrial and commercial installations. Aluminum supports: €20–€50 per meter, lightweight and corrosion-resistant, ideal for specialized or outdoor applications. Stainless steel supports: Higher-end pricing, often exceeding €50 per meter, used in environments requiring high hygiene or extreme corrosion resistance.

Factors Affecting Cost

Type of tray support: Ladder trays, perforated trays, and wire mesh trays differ in price, with ladder trays generally costing more due to their ability to carry heavier cables. Load capacity: Supports designed for heavy power cables or industrial applications are more expensive than those for light data or control cables. Coatings and finishes: Hot-dip galvanized (HDG) or powder-coated supports increase durability but add to the upfront cost.

Order quantity: Bulk purchases often reduce the per-meter cost, while small orders may include higher supplier margins. Installation and shipping: Labor, equipment depreciation, and transport costs can significantly affect the total project cost.

Austrian Suppliers

Several Austrian suppliers offer cable tray supports and accessories, including GroupSumi and Eurotray, providing a wide range of sizes and materials suitable for industrial, commercial, and data center applications. Local suppliers may also offer custom solutions and turnkey installations, which can influence pricing.

Cost-

Saving Tips

Opt for perforated or wire mesh trays if heavy load capacity is not required, saving up to 15% compared to ladder trays. Buy in bulk or negotiate long-term supply contracts to reduce unit costs. Consider pre-galvanized steel for indoor applications to lower upfront costs while maintaining adequate durability.

In summary, Austrian cable tray supports are affordable and versatile, with prices ranging from €10 to €50 per meter depending on material, type, and application requirements, and additional costs may arise from installation, coatings, and shipping.
