

Cable Tray Customization Price List

Overview

stainless steel cable tray price list Discover competitive pricing for high-quality stainless steel cable trays with superior corrosion resistance, excepti.

Key Takeaways

Customized cable tray prices vary widely based on material, type, size, and application, ranging from \$0. 80 to over \$76 per unit for industrial-grade trays.

Overview of Cable Tray Pricing

Cable tray costs depend on material, design, dimensions, and customization requirements. Common materials include stainless steel, aluminum, FRP (fiber-reinforced plastic), and galvanized steel. Prices also vary by type, such as ladder-type, perforated, solid-bottom, wire mesh, or large-span trays.

B2

B vs B2C PricingB2B (Industrial/Commercial): Prices range from \$0. 80 to over \$76 per unit, depending on size, material, and bulk order volume. These trays are durable, suitable for factories, data centers, and infrastructure projects, and often require a larger initial investment.

B2

C (Home/Office): Smaller trays for personal or office use cost \$15-\$34, with wholesale prices as low as \$0. 92. These are typically under-desk or compact solutions with easy installation features like no-drill clamps.

Material-

Specific Pricing

Stainless Steel (304/316 grades): Premium trays with high corrosion resistance and fire safety compliance. Prices vary by width (50mm–900mm) and depth, with additional costs for modular systems, adjustable brackets, and specialized accessories. **Aluminum:** Lightweight and corrosion-resistant, often used in industrial and commercial settings.

Pricing is generally lower than stainless steel but higher than basic steel trays.

FR

P or Composite Trays: Fireproof and suitable for chemical or high-temperature environments. Prices depend on load-bearing capacity and environmental protection features. **Perforated or Hot-DIP Galvanized Trays:** Customizable for earthquake resistance and cable stability, widely used in communication, solar, and thermal power projects.

Example Customization Costs

Coupler plates with hardware for 25/50mm height trays: ₹16 per piece
Coupler plates for 75/100mm height trays: ₹30 per piece
Minimum order quantities and GST may apply, with delivery typically within 3–5 days for ex-stock items.

Factors Affecting Customization Price

Tray Dimensions: Width, depth, and length directly influence material cost. **Material Grade:** Higher-grade stainless steel or aluminum increases price. **Design Complexity:** Ladder, perforated, or solid-bottom designs have different manufacturing costs.

Load Capacity: Trays designed for heavy-duty industrial use cost more. **Certifications:** ISO, CE, and SGS certifications may add to the cost but ensure quality and compliance. **Bulk Orders:** Larger quantities reduce per-unit cost but require higher upfront investment.

Conclusion

Customized cable tray pricing is highly variable, ranging from budget-friendly options for small-scale use to premium industrial-grade solutions. For precise quotes, it is recommended to provide tray dimensions, material preferences, load requirements, and quantity to suppliers, as these factors significantly influence the final cost.
