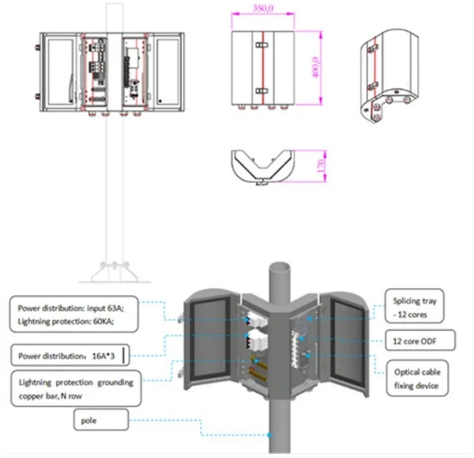
Check the ownership of optical fiber cables



Overview

This interactive submarine cable map shows the global undersea fiber optic cables connecting world. Explore cable routes, landing stations and system status. I traced the ownership of the undersea cables carrying 95% of global internet traffic and found a map that mirrors colonial geography with unsettling precision — the same ports, the same routes, the same directional logic of extraction, now controlled by a handful of tech giants. I started this. Is there any way for me to find out who owns the fiber optic line on my road, what services are provided by it, and what companies provide those services?

If you walk it out you maybe might find a hand hole or pedestal with a companies name on it. Fiber optic cables are the. Optical Time Domain Reflectivitymay be used to determine the precise geographic location of the fault.
