Components of Welding Machine Distribution Box

Overview

The primary components include the transformer, rectifier, and control panel. The transformer is responsible for converting the incoming AC voltage to a suitable level for the welding process. Power Source: This unit controls the flow of electricity to the torch or electrode holder. Page 1 WeldingRACK ™ 6-Pack Welder Power Distribution Station Installation & User Manual • Distribute Power to Six Standard Welders • Provides 120 VAC Convenience Power • Stores & Transports Welders in a Robust, Convenient Rack • Made in the USA LM-WR6 - Rev. Welcome the WR6 WeldingRACK. Makes connecting up to 10 Multi-Weld® 350s quick and easy. Four "pig tails" included. Featuring multiple. Every complex system consists of various interconnected elements that work together to achieve optimal performance.
