Control Channel Cable Tray

Overview

A Channel Cable Tray is a compact, one-piece, U-shaped support system, typically 1-3/4″ deep, designed to carry a single power cable or multiple smaller cables like instrumentation, data, and control wires. It's the go-to solution for precise, point-to-point cable routing. Unlike its larger counterparts, the Channel Tray is not designed for bulk capacity. These decisions are relatively simple and can be condensed down to four steps. Material choice T&B channel tray systems are fabricated from a corrosion-resistant metal (low-carbon steel, stainless steel or an aluminum alloy) or from a metal with a corrosion-resistant finish (zinc or epoxy). Today, electrical cable trays have become an essential component in industrial and commercial construction, providing a quick, economical, and. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia.
