Cost of FRP Cable Trays in Africa

Overview

Find the best South Africa Frp Cable Tray and explore our extensive collection of high-quality Frp Cable Tray from South Africa. Buy wholesale Frp Cable Tray in South Africa from trusted suppliers.

Key Takeaways

FRP cable trays in Africa typically cost more than standard metal trays, with prices varying by type, size, and supplier, generally ranging from $30 to $100 per meter depending on specifications.

Price Range and Factors

The cost of FRP cable trays depends on several factors including the type of tray, dimensions, load capacity, and installation environment. Per meter prices are generally higher than galvanized steel or aluminum trays due to the corrosion resistance, chemical resistance, and non-conductive properties of FRP material. Typical price ranges are: Perforated FRP trays: Suitable for moderate cable loads with ventilation, generally $30–$60 per meter.

Solid bottom FRP trays: Provide maximum cable protection, often used in clean rooms or EMI/RFI-sensitive areas, typically $50–$100 per meter.

Channel or U-shaped FR

P trays: Used for small cable runs or instrumentation wiring, usually $30–$50 per meter.

Regional Availability

South Africa: Local manufacturers like Saar Industries supply FRP trays with options for perforated, solid bottom, and channel types. They emphasize custom designs, corrosion resistance, and fast delivery. Import data also shows active trade of FRP trays into South Africa, indicating availability from both local and international suppliers.

East Africa (Kenya, Uganda, Tanzania): While FRP trays are less common than metal trays, suppliers in Kenya provide cable tray systems and can source FRP trays on request, often with delivery across major cities and neighboring countries. Advantages Affecting CostFRP trays are lightweight, strong, and resistant to rust, chemicals, and moisture, making them ideal for harsh industrial environments. They also do not conduct electricity, enhancing safety near electrical installations.

These benefits justify the higher cost compared to traditional metal trays.

Summary

When budgeting for FRP cable trays in Africa, expect $30–$100 per meter, with the exact price influenced by tray type, size, and supplier location. South Africa has the most established local manufacturing, while East African countries may rely on imports or specialized suppliers.

Choosing FR

P trays ensures long-term durability and reduced maintenance costs, especially in corrosive or high-moisture environments.
