Cost of fabricating vertical bends for cable trays

Overview

Customizable Vertical Cable Tray Bends This guide explores the critical factors to consider when selecting a vertical cable tray bend for industrial, comme.

Key Takeaways

Vertical cable tray bends typically range from $20 to $150 per piece, depending on material, size, and configuration.

Overview of Vertical Bends

Vertical bends are essential components in cable tray systems, allowing smooth transitions between horizontal and vertical sections while protecting cables from damage and maintaining organized routing. They are commonly used in industrial, commercial, data center, and telecommunication installations. Bends come in various types, including 45-degree, 90-degree, radius bends, and custom bends, and can be made from steel, aluminum, or fiberglass.

Price Factors

Material: Steel (galvanized or powder-coated) is durable and suitable for heavy-duty applications, generally priced higher. Aluminum is lightweight and corrosion-resistant, often slightly more expensive than steel for similar sizes. Fiberglass is non-conductive and used in specialized environments, typically at a premium.

Bend Type and Angle: 90° bends are the most common and moderately priced. 45° bends are usually less expensive due to smaller material requirements. Radius bends or custom bends can cost more due to specialized manufacturing.

Size and Load Capacity: Larger widths and higher load capacities increase the price. Standard widths (e.g., 12 inches) are more affordable, while custom dimensions can significantly raise costs. Supplier and Shipping: Prices vary by supplier and region.

For example, suppliers on Alibaba list vertical bends starting around $20–$50 for standard sizes, while specialized kits or adjustable bends can reach $100–$150 per piece. Shipping and bulk orders may affect the final cost.

Typical Price Examples

Standard 90° vertical steel bend: $25–$60Aluminum 90° vertical bend: $40–$80Adjustable vertical bend kit (up to 180°): $100–$150Custom radius or specialty bends: $120–$200 depending on specifications ConclusionThe price of vertical cable tray bends depends on material, angle, size, and supplier. For standard installations, expect $20–$80 per piece, while adjustable or custom bends can cost $100–$200. It is recommended to request quotes from multiple suppliers to get the most accurate pricing for your specific project requirements.
