Digital Display Instrument Distribution Box

Overview

The D-BOX® accommodates temperature, pressure, level and flow transmitters, meters, indicators, analyzers, integrators, and many other head-mount and hockey-puck instruments. The RAILTEC BP M22 is a versatile electronics enclosure designed for simple and quick mounting on EN 60715 TH35 DIN rails. Product advantages: ■ergonomic keypad enclosures with operating face inclined at 10°, a real asset when operating and reading. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. Each component plays a specific role. Together, they make sure the electrical power distribution box works well and safely. Available in non-vented and vented versions, and made from extruded aluminum frames with flat aluminum top and bottom panels, these enclosures are textured powder coated and are. Q: Is the Aluminum Explosion-Proof Distribution Box suitable for outdoor use?

A: Yes, the Aluminum Explosion-Proof Distribution Box is designed for outdoor use and is weatherproof to protect digital display instruments from environmental elements.
