

FSP28 optical module price

Overview

Get diverse armored fiber patch cables for stronger protection of the optical fibers and stable transmission to support fiber optic cabling in harsh environments.

Key Takeaways

FSP28 (SFP28) optical modules typically range from \$35 to \$300 per unit depending on type, range, and vendor.

Price Overview

The cost of FSP28 optical modules varies widely based on range (SR vs LR), manufacturer, and whether the module is OEM or third-party. For example, short-range (SR) SFP28 modules for 25G Ethernet can start as low as \$35 per unit for compatible third-party options, while long-range (LR) modules from original manufacturers may cost \$200-\$300 or more per unit. Bulk purchases often reduce the per-unit cost significantly.

Factors Affecting Price

Module Type and Range: SR modules (up to 100m over multimode fiber) are cheaper than LR modules (up to 10 km over single-mode fiber) due to simpler optics and lower production costs.

OE

M vs Third-Party: Original manufacturer modules (e.g., HPE, Cisco) are priced higher, often \$200–\$300, while third-party compatible modules can be 2–5 times cheaper.

Volume Discounts: Purchasing in bulk can reduce costs; for instance, 400 QSFP28 modules could drop from \$780 per unit OEM to \$280 per unit third-party.

Technical Features: Modules with advanced features like DOM (Digital Optical Monitoring), extended temperature ranges, or specific EEPROM coding may cost more.

Example PricingHPE 25Gb SFP28 SR 100m: Available on Amazon and HPE Store, typically priced around \$150–\$200 per unit for OEM modules.

Third-

Party Compatible SFP28 SR/LR: Can be found for \$35–\$280 per unit, depending on range and vendor.

Practical Advice

When purchasing FSP28 modules, consider: Compatibility with your switch or server platform. Warranty and support from the vendor. Total cost including shipping, taxes, and potential testing or validation.

By comparing OEM and third-party options, organizations can often achieve significant savings without compromising performance.

Discover 100G QSFP28 module pricing. Learn key cost factors, considerations, and real examples to make informed purchasing decisions for your network.

SFP28 • transceivers, optical modules

SFP28 is a transceiver consisting of a transmitter and a receiver, used to switch between the fiber optic interface to electrical and vice versa. It connects the main board of a switch, router, HBA card or

SFP28 Optical Transceiver Modules (25G-SR/LR)

Buy 25G SFP28 Optical Transceiver Modules by Amphenol XGIGA Factory-Direct at Cables on Demand! Optimized for data rates up to 28.0 Gbps per SFP28 channel in 25GBASE-SR1 (Short

25G SFP28 Optical Transceiver Modules | FiberMall

Generally speaking, the 25G SFP28 belongs to the low-speed optical module type in the optical module market. The SFP28 transceivers make up for the defect that the price of the 40G and 100G optical

25G SFP28 Optical Transceiver | Fiber Optic Module Factory

Get 25G SFP28 optical transceiver modules at wholesale factory prices. Reliable performance, full compatibility, and global shipping. Ideal for data center, HPC.

Genuine Transceiver Modules

Buy genuine transceiver modules of Brocade, Cisco, Finisar, HPE, Huawei, Intel, Juniper and more from GenuineModules with best price and fast worldwide
