

Fireproof and heat-insulating cable trays

Overview

Fire resistant cable trays are cable trays with fire-resistant boards as the core protective layer. The Daken Fire-Resistant Cable Tray (DFCT) is a new-generation cable protection system that integrates fire resistance, structural load-bearing capacity, and ventilation into one single solution. 7 products are successfully used to protect cables in high-rise buildings, industrial buildings, and offshore facilities as well as in sensitive areas, such as hospitals, airports, production. Fireproof cable trays are specialized support systems designed to hold and protect electrical cables while withstanding high-temperature conditions. Unlike standard trays, they're engineered to resist fire propagation, often with added coatings, insulation, or material enhancements that delay heat.
