

Gydt Optical Cable Technical Requirements

Overview

GYDTS fiber optic cable is with corrugated steel tape armored and it is a ribbon type fiber cable which is suitable for installation in aerial or duct environment especially where high density fibers are expected. 3-2009 Optical fiber ribbon cable for access network Technical. Long-tensile load:. This Specification covers the design requirements and performance standard for the supply of optical fibre cable in the industry. XCOM ensures a stable quality control system for our cable products through several programs including ISO 9001, ISO 14001 and OHS. Optical fibres are housed in loose. Loose tube construction, tubes jelly filled, elements (tubes and fillers when necessary) laid up around metallic central strength member, polyester yarns used to bind the cable core, filling compound filled in the apertures of the cable core, two ripcords, steel tape armored, then PE outer sheath. The central strength member is a metallic rod; for certain fiber counts, the metallic strength member may be extruded with a polyethylene. Fiber optic cable GYTS, 2~144 bers central strength member (steel), jelly lled, ber contained loose tube and PP ller (if necessary) stranded, water blocking jelly, longitudinally covered by copolymer steel tape, PE outer sheath.

Article Content

Gydt's Optical Cable Technical Requirements

Optical fibres are housed in loose. The structure of GYDTS optical cable is to put 4, 6, 8, 12 core optical fiber ribbon into a loose tube made of high modulus material, and the loose tube is filled with

Optical Fibre Cable Technical Specification

1.1 Scope This Specification covers the design requirements and performance standard for the supply of optical fibre cable in the industry. YOFC ensures a stable quality control system for our cable

GYTS Armored Optical Cable Specifications

The document provides specifications for the Armored Optical Cable (GYTS) manufactured by Fiber Hope Optical Communication Tech Co., Ltd., detailing its construction, technical specifications, and

Layer Stranded Armoured Optical Cable

Loose tube construction, tubes jelly filled, elements (tubes and fillers when necessary) laid up around metallic central strength member, polyester yarns used to bind the cable core, filling

Standard Stranded Loose Tube Ribbon Optical Cable (GYDTS)

Loose tubes (and fillers) are stranded around the central strength member to form a compact and circular cable core, with the interstices filled with water-blocking compound.

GYTS Outdoor Optical Cable

GYTS is the outdoor fiber optic cable type used for duct and aerial applications. The loose tube stranding technology makes the fibers have good secondary excess length.

GYTS Fiber Optic Cable

GYTS Fiber Optic Cable General Details Fiber optic cable GYTS, 2~144 bers central strength member (steel), jelly lled, ber contained loose tube and PP ller (if necessary) stranded, water blocking jelly,

Loose Tube Layer Stranded Light Armored Optical Cable (GYTS)

The core of the cable consists of a central metal strength member, around which the loose tubes (and filler ropes) are twisted to form a compact and circular core.

What is GYDTS Ribbon Cable?

GYDTS fiber optic cable is with corrugated steel tape armored and it is a ribbon type fiber cable which is suitable for installation in aerial or duct

Gydts Optical Cable 144core G652D Fiber Duct Cable

Gydts Optical Cable 144core G652D Fiber Duct Cable HDPE Sheath Ribbon Cable, Find Details and Price about Communication Cable Patch Cable from Gydts

ADSS Fiber Optic Cable Specifications

ADSS Fiber Optic Cable Specifications This document specifies the technical requirements for an ADSS (All-Dielectric Self-Supporting) fiber optic cable that can span 80 meters. It outlines the cable

GYDTS Fibre Optic Cable Applicate in Outdoor for ...

GYDTS Fibre Optic Cable Applicate in Outdoor for Communication and Data Center
GYDTS fiber optic cable is with corrugated steel tape armored and it is a ribbon type fiber cable which is suitable for

Microsoft Word

1. General This specification covers the design requirements and performance standard for the supply of optical fibre cable in the industry. It also includes YOFC premium designed cable

Stranded Loose Tube Light-armored Ribbon Fiber

Stranded Loose Tube Light-armored Ribbon Fiber Cable□GYDTS□ Description The ribbon4, 6,8,12 fibers, are positioned in a loose tube made of a high

Numeko Technologies | Limitless Achievement

Starting with R&D in the field of optical communications, FiberHome Technologies has developed the core optical communication technologies, which include optical communication

Ribbon Cable Series

The GYDTS optical cable is an outdoor communication optical cable. It adopts a loose-layer layer-wound light-armored structure, featuring excellent mechanical properties, temperature characteristics and

Minimum Technical Specification for 02 Core Armored Fiber Optical Cable ...

Minimum Technical Specification for 02 Core Armored Fiber Optical Cable Product with higher specification will be accepted. ... Additional Parameter:

Optical cable material selection and aging

The optical fibre must be of high quality which is verified through different qualification tests including long-term aging such as temperature aging, water aging, sunlight aging and color stability. To protect
