Handheld Relay Protection

Overview

Discover the RDJB-802H Handheld Relay Protection Tester, a portable and versatile tool for testing and maintaining protection devices in power systems. Ideal for field use.

Key Takeaways

Handheld relay protection devices are portable testers designed to evaluate, calibrate, and maintain electrical protection relays in power systems efficiently and safely.

Overview

Handheld relay protection devices are compact, battery-powered instruments used to test and maintain protective relays in power grids, substations, power plants, and industrial electrical systems. They allow engineers and technicians to perform secondary injection tests, simulate faults, and verify relay operation without requiring large, stationary test setups. These devices are particularly useful for fieldwork and outdoor maintenance due to their portability and lightweight design.

Key Features

Portability and Size: Most handheld testers are lightweight (around 3–4 kg) and compact, often comparable in size to a tablet, making them easy to carry to remote locations (Kingsine KFA310, Wrindu RDJB-802H, HZJB-430). Power and Output: They provide multiple voltage and current outputs, with some models capable of up to 50A and 130VA output power, suitable for testing medium- and low-voltage protection devices. User Interface: High-definition touch screens or shortcut function keys simplify operation, allowing manual or automated testing routines.

Some devices support wireless control via WiFi, RS232, or Ethernet. Testing Capabilities: Handheld testers can perform a wide range of tests, including: Overcurrent, zero-sequence, and voltage protection testsImpedance and fault simulation (single-phase, interphase, or three-phase faults)Harmonic injection and frequency response tests (ROCOF, df/dt)Differential and distance protection verificationEnergy meter calibration and multi-device synchronous testing Safety Features: Built-in protections include overcurrent alarms, short-circuit protection, overload protection, and overheat protection to ensure safe operation in field conditions.

Applications

Handheld relay protection devices are widely used in: Power grid companies and substations for routine relay maintenance and commissioningPower plants and industrial facilities to verify relay performance and simulate fault conditionsConstruction and electrical equipment operations for testing newly installed protection devicesField testing where portability and battery operation are essential Popular ModelsKingsine KFA310: Compact, iPad-sized, supports AC/DC tests, harmonic and distance testing, and multi-channel differential tests. Wrindu RDJB-802H: Lightweight, supports up to 50 test states, wireless and wired control, and advanced fault simulation.

HZJB-430: High-precision, modular design, supports multiple control interfaces, and suitable for intelligent terminal devices in distribution networks.

Hua

Zheng HZJB-1700: Focused on low-voltage microcomputer line protection, supports AC voltage/current testing, differential protection, and various fault simulations.

Conclusion

Handheld relay protection devices provide efficient, portable, and safe solutions for testing and maintaining protective relays. Their versatility, high-precision outputs, and advanced safety features make them essential tools for electrical engineers working in both field and laboratory environments. They enable accurate verification of relay performance, fault simulation, and system commissioning without the need for bulky equipment.

Article Content

What is the Wrindu Handheld Relay Protection Tester?

Discover the RDJB-802H Handheld Relay Protection Tester, a portable and versatile tool for testing and maintaining protection devices in power systems. Ideal for field use.

KINGSINE KFA310 Handheld Protection Relay Test kit/Set

With its high-precision output, this mini handheld secondary injection test set can be used as a standard source. The following table summarizes the changing values of different current output using

Kingsine KFA300 Mini Handheld Protection Relay Tester

Ipad size, built-in battery design, for on-site maintenance and testing of non-electric environment, protection relay testing, secondary circuit inspect and secondary

YCRT-Z70 Handheld Relay Protection Tester

Supports distance protection, zero-sequence protection, group tests, harmonic tests, high/low frequency tests and fault re-transmission. Compatible with Beidou, GPS and B-code time synchronization.

HuaZheng Electric HZJB-1700 Handheld Three phase Relay Protection ...

It can also test the protection functions of the low voltage microcomputer line protection, such as re-pressurization blocking direction

PRE 431S PRO Handheld Relay Test System

Discover the PRE 431S PRO hand-held relay test system—lightweight at just 3.2kg, with a 10.1 hi-bright touch screen, built-in lithium battery, and independent

PRE-431S pro Hand-held Relay Test System

Home > Products > Electric Test Instruments > Relay and Protection Testing > PRE-431S pro Hand-held Relay Test System

Handheld Secondary Relay Set: My Real-World Experience

Handheld six-phase relay protection test kits offer accurate fault simulation and stable performance suitable for diverse relay types, validated through real-world testing in extreme environmental

Specialised Tools for Reliable Protection System Testing

Ensure the reliability and safety of your protection system with Megger''s specialised tools and accessories—ideal for testing auxiliary relays and handling complex or

SIPROTEC Protection Relays | Siemens

SIPROTEC: Multifunctional protection relays Experience the benchmark in grid protection, automation, and monitoring! SIPROTEC 5, built on extensive field experience, offers comprehensive

13 Best Handheld Gaming Consoles (June 2026) Guide

Explore the best handheld gaming consoles in 2026. We tested 13 models across all budgets - from $37 retro picks to $700 Windows PC handhelds - to find the top options.

LED Screen Display Portable Digital Handheld Three

HZJB-430 handheld relay protection tester is mainly used in power grid companies, power plants, electric construction companies, comprehensive security

Hertz Hzjb-430 Digital Portable Handheld Three Phase Relay Protection ...

HZJB-430 handheld relay protection tester is mainly used in power grid companies, power plants, electric construction companies, comprehensive security manufacturers, petrochemical companies,

Kingsine''s Relay Protection Tester for Protection Testing

A relay protection tester is a device used to test and verify the performance of relay protection devices in power systems. One of its core functions is protection testing, which aims to ensure that relay

ONEXPLAYER APEX:World''s Most Powerful 8" Gaming

The World''s First Liquid - Cooled Gaming Handheld OneXPlayer Frost Bay - Ultimate Silent Cooling OneXPlayer Frost Bay - Liquid Cooling Crafted with full

HuaZheng Electric HZJB-1700 Handheld Three phase Relay Protection ...

The secondary defect elimination tester HZJB-1700 is controlled by single chip microcomputer, which is simple in function and convenient to carry. It can be used to test the action value and time of AC

Mini Handheld Relay Tester KFA310 Hardware Introduction

3.7kg Mini Handheld Relay Tester KFA310, offers 4x300V and 3x20A outputs, 50A max, focus on maintenance and testing of distribution and medium-low voltage protection devices in non-electrified

Digital High Accuracy Electric Handheld Secondary Current Injection ...
