

How much does 1 meter of fiber optic cable with 6 cores cost

Overview

Discover the cost of fiber optic cable in this pricing guide. Learn material prices, installation factors, and what impacts total project costs overall.

Key Takeaways

A 6-core fiber optic cable typically costs between \$0.65 and \$2.60 per meter, depending on type, protection, and installation conditions.

Price Range and Factors

The cost of a 6-core fiber optic cable varies based on several factors: **Cable Type:** Single-mode cables are generally less expensive than multimode cables. Standard indoor single-mode cables can start around \$0.65 per meter, while multimode cables may cost more, especially OM3/OM4 types used for high-speed data centers.

Protection and Environment: Armored or outdoor-rated cables designed for harsh conditions can increase the price by \$0.50-\$1.50 per meter compared to standard indoor cables.

Jacket Material: LSZH (Low Smoke Zero Halogen) jackets or UV-resistant PE jackets for outdoor use add to the cost. **Installation Complexity:** While the base cable cost is per meter, additional costs for connectors, splicing, conduit, or labor are extra and can influence the overall per-meter expense.

Typical Cost Estimates

Standard indoor 6-core cable: \$0.65–\$1.50 per meter
Outdoor or armored 6-core cable: \$1.50–\$2.60 per meter

High-end or specialized cables (gel-filled, direct burial, or pre-terminated): may exceed \$3.00 per meter
Summary: For budgeting purposes, a 6-core fiber optic cable in typical indoor conditions will likely cost around \$1–\$2 per meter, while outdoor or armored variants can approach \$2.50 per meter or more.

Prices can vary depending on vendor, fiber type, and environmental requirements, so it is advisable to request quotes for the specific cable specifications needed.
