

How to group household electrical distribution boxes

Overview

Once all the cable sheathing has been stripped, you can loosely group like-wire groups—grounds, neutrals, and hots—in advance of terminating them (attaching wires to lugs) inside the panel. As is customary in all phases of house wiring, terminate the ground wires first. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. The. A well-chosen distribution box ensures the safety and efficiency of your household electrical system. "Switching" here means turning a circuit on or off.
