

Installation price of mesh cable trays

Overview

Cable Tray Cost Comparison Compare cable tray costs by type, material, and installation. Find the most cost-effective option for your project in this detail.

Key Takeaways

Installing a set of mesh cable trays typically costs between \$10 and \$25 per meter, including materials and labor, depending on material, length, and installation complexity.

Material Costs

Wire mesh (basket) cable trays are among the most affordable types of cable trays. They are made of fine steel wire welded into a tray, ideal for lightweight cables such as internet or data lines in offices and data centers. The material cost for mesh trays generally ranges from \$2 to \$25 per meter, depending on the steel type, coating, and supplier.

Pre-galvanized steel is the cheapest, suitable for dry indoor areas, while stainless steel is the most expensive, used in corrosive or hygienic environments.

Labor and Installation Costs

Labor often exceeds the material cost. Mesh trays are lightweight and easy to handle, which reduces installation time compared to ladder or solid-bottom trays. Skilled workers typically install mesh trays at a rate of \$5 to \$25 per meter, depending on the complexity of the route, number of fittings (elbows, tees, reducers), and accessibility.

Installation is faster because cables can be laid directly into the open tray without threading through pipes, saving both time and labor costs.

Additional Cost Factors

Fittings and accessories: Elbows, tees, covers, and supports add to the total cost. Each fitting may seem inexpensive individually but can accumulate quickly. **Project scale:** Large installations may benefit from bulk pricing on trays and fittings.

Environmental considerations: Outdoor or corrosive environments may require coated or stainless steel trays, increasing costs. **Maintenance and flexibility:** Mesh trays allow easy inspection and cable addition, potentially reducing long-term operational costs.

Summary Estimate

For a typical office or data center installation: **Material:** \$2-\$15 per meter for standard steel mesh trays **Labor:** \$5-\$10 per meter for installation **Total installed cost:** \$10-\$25 per meter, with higher-end costs for stainless steel or complex routes. Choosing mesh cable trays is often cost-effective due to lower material costs, faster installation, and easier maintenance compared to ladder or solid-bottom trays.
