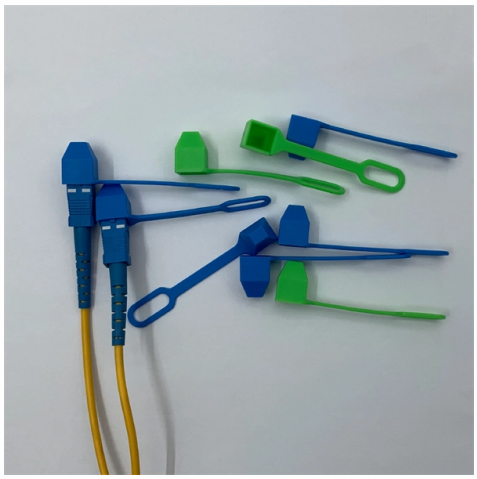
Integrated optical power meter lc



Overview

An optical power meter is an essential fiber optic test tool, used for measuring absolute transmit / receive power in dBm, cable loss in dB, and for continuity checking / troubleshooting. It is used by technical staff across every industry sector. Four in one function intelligent charging design This machine integrates four major functions: optical power meter, fiber testing pen, RJ45 network cable testing, and LED lighting. Power measurement range (+10 ~ -70 dBm) with FC/SC/LC Adapters. Its positive-stop trigger mechanism provides the right pressure every time to. Troubleshoot fast with a built-in multi-fiber VFL, duplex power meter, and optional end face inspection. And it's all on the powerful, proven Versiv platform. With more than 10,000 Certified Cabling Test Technicians (CCTT) in the field, the CertiFiber Max OLTS is already part of a familiar, trusted. The OLP-82 from VIAVI Solutions is the first handheld tool to combine pass/fail fiber inspection and optical power measurement (OPM) into one solution. OLS4 is an integrated two-port LED (850 and 1300nm) and laser (1310 and 1550nm).
