Featuring robust. PAM4 is a branch of the pulse amplitude modulation (PAM) technology, which is a mainstream signal transmission technology following non-return-to-zero (NRZ). The application note uses 56 Gbps to describe data rates in general because of. Line side Optics is already proceeding with PAM4. PAM6 will likely need stronger FEC compared to PAM4. This would result in line rate increase thereby giving up the baud rate advantage. 3 af/at standard and are able to deliver up to 30 watts of power per port along with data over standard Ethernet cabling.
