Network cabinet depth 1200mm

Overview

It''s the network cabinet with the right design and construction to bring lasting security and reliability to your high-density build. Comes fully assembled on a pallet due to size.

Key Takeaways

1200mm deep network cabinets are ideal for high-density IT setups, offering ample space for servers, PDUs, and cable management while supporting heavy loads.

Overview

Network cabinets with a depth of 1200mm (approximately 47 inches) are designed to accommodate standard 19-inch rack-mounted equipment, including servers, routers, patch panels, and power distribution units (PDUs),. This depth provides expansive rear channels, making it easier to manage cables, install vertical PDUs, and maintain accessibility for service and upgrades.

Key Features

Height and Capacity: Commonly available in 42U or 24U sizes, supporting static loads up to 3000 lbs (stationary) and dynamic loads when equipped with casters. Material and Build: Typically constructed from cold-rolled steel or galvanized steel, ensuring durability and stability. Cable Management: Full-height cable management rails, vertical organizers, and adjustable mounting rails allow for organized and efficient setups.

Mobility and Installation: Many cabinets come pre-assembled with locking casters for mobility and leveling feet for secure placement. Tool-less button mounts simplify installation of PDUs and other accessories. Ventilation and Cooling: Perforated doors and top panels compatible with cooling fans help maintain optimal airflow and prevent overheating.

Compatibility: These cabinets are compatible with a wide range of servers and networking equipment from brands like Dell, HP, IBM, and Lenovo. Examples of 1200mm Deep CabinetsLenovo 42U 1200mm Deep Rack: Designed for high-availability environments, supports up to 8x 0U vertical PDUs, and can handle fully loaded configurations up to 950 kg (2,100 lbs).

Nave

Point 42U Commercial Series: Supports 19-inch equipment, pre-assembled, with adjustable mounting rails, lockable doors, and heavy-duty casters. Comms Express 800mm Wide x 1200mm Deep Cabinets: Suitable for server and edge computing applications, compatible with Dell, HP, and IBM servers.

EF

B Elektronik 24U Network Cabinet: Offers step-less depth-adjustable 19-inch profiles, self-ventilated housing, and pre-assembled steel frame.

Considerations

When selecting a 1200mm deep network cabinet, consider: Equipment depth: Ensure the cabinet depth accommodates your servers and PDUs. Load capacity: Verify static and dynamic weight limits. Cable management needs: Check for vertical and horizontal organizers.

Cooling requirements: Ensure adequate airflow for high-density setups. Mobility vs. stationary use: Decide if casters or fixed placement is preferred. These cabinets are widely used in data centers, server rooms, and high-density IT environments, providing flexibility, accessibility, and robust support for modern networking and computing equipment.
