New Zealand Non-metallic Outdoor Optical Cable

Overview

Outdoor GYFTY fiber optic cable is a non-metallic cable used for power transmission system, excessive thunder areas and high electromagnetic interface. Its mainly application is for aerial or duct use. We supply both single mode GYFTY cable and multimode GYFTY cables. Designed with an all-dielectric structure, these cables are non-conductive and entirely immune to lightning strikes and electromagnetic. CommScope outside plant fiber optic cables are meticulously designed to withstand the rigors of outdoor environments while ensuring superior performance and broadband connectivity. The portfolio includes armored, non-armored and. This Loose tube dielectric optical cable is designed for external underground installations in ducts by pulling, jetting or floating techniques or by direct burial in open-cut trenches. Most outdoor fiber cables are loose buffer design, with the strengthen member in the middle of the whole cable, the loose tubes surround the central strength member.
