

Optical cable gyt2

Overview

This GYTA Outdoor Aerial and Duct 2-48 Core Fiber Optic Cable has been designed for long haul / backbone application. Our stranded loose tube design provides stable performance over a wide temperature range and is compatible with any telecommunication grade optical fiber. It is known for its high tensile strength, high flexibility, and excellent transmission performance. In this article, we will discuss the characteristics of the GYTA optical cable. Full specifications, samples and bulk pricing on request — we typically reply within 24 hours. precise control for fiber excess. Loose tube construction, tubes jelly filled, elements (tubes and fillers when necessary) laid up around metallic central strength member, polyester yarns used to bind the cable core, filling compound filled in the apertures of the cable core, two ripcords, steel tape armored, then PE outer sheath.
