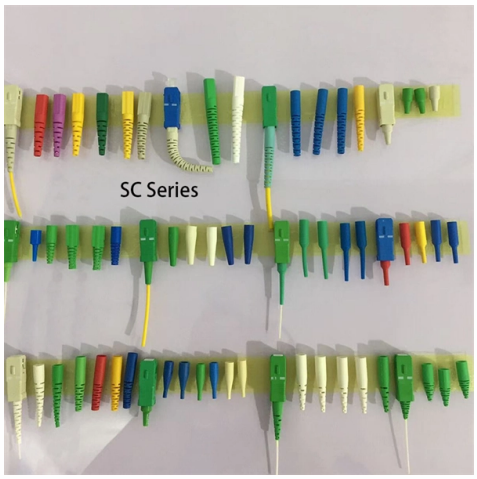
Palau OPGW optical cable price



Overview

If you're a typical user, you don't need to overthink this: for most utility upgrades, a 48-core OPGW cable priced between $600–$800 per km (MOQ 1–5 km) delivers balanced performance and supply reliability. Skip bulk-only suppliers quoting under $400/km unless they provide full type-test. Over the past year, OPGW cable pricing has tightened—not because of new technology, but because aluminum and steel raw material costs have swung sharply, and global grid modernization projects now demand higher fiber counts (96–144 cores) more consistently. For example: A 24-core OPGW cable is estimated to cost around RMB 15,000 per kilometer. A 72-core OPGW cable might reach up to RMB 30,000 per kilometer or more, depending on. OPGW is mainly applied in communication line of newly constructed high voltage transmit electricity system with 35 KV or above, or replacement of existing ground wire of previous overhead high voltage transmit electricity system, adding of communication lines and conduction of short-circuit current. Finally, the price of the optical cable. We always adhere to the customer-centric service concept to provide customers with suitable optical. How does 6W market outlook report help businesses in making decisions?

6W monitors the market across 60+ countries Globally, publishing an annual market outlook report that analyses trends, key drivers, Size, Volume, Revenue, opportunities, and market segments. This report offers comprehensive.
