Price of 100km Optical Cable Line

Overview

A practical frame is $40,000–$350,000 per km, with a common mid-range around $120,000–$180,000 per km for standard single-mode fibre in ducted runs. Per-unit considerations include $/km for total project, $/duct meter for ducting work, and $/splice for termination. The cost of fiber optic cable per kilometer can vary significantly based on a variety of factors, including the type of fiber optic cable, the geographical region, the installation environment, and the specific requirements of the project. Understanding these factors can help in estimating the. Fiber optic cables retail, on average, for a cost between $1 and $6 per foot for the cable alone. The type of fiber optic cable selected based on your requirements, length of installation, and number of fiber. Buyers typically see a wide range for fibre optic trenching and installation per kilometer, driven by terrain, permitting, and trenching methods. The price experience varies with splice work, cable type, and right-of-way costs. If you're looking for a comprehensive overview of what affects overall cables price, refer to our Fibre & Network Cables Price Guide. Single-mode fiber costs less per foot than multimode fiber, but it requires more expensive equipment. Underground installation incurs higher costs than aerial installation or indoor runs. Fiber. CRU provides comprehensive, accurate and up-to-date price assessments and research reports for bare optical fibre across various key regional markets, combined with insights into the factors and events affecting markets.
