

Price of Fixed Horizontal Cable Trays

Overview

Cable Tray Horizontal Price: Best Deals 2026 Selecting the right horizontal cable tray involves more than just comparing unit prices. A strategic evaluation.

Key Takeaways

Horizontal cable trays currently range from approximately \$2 to \$50 per meter, depending on material, type, and installation requirements.

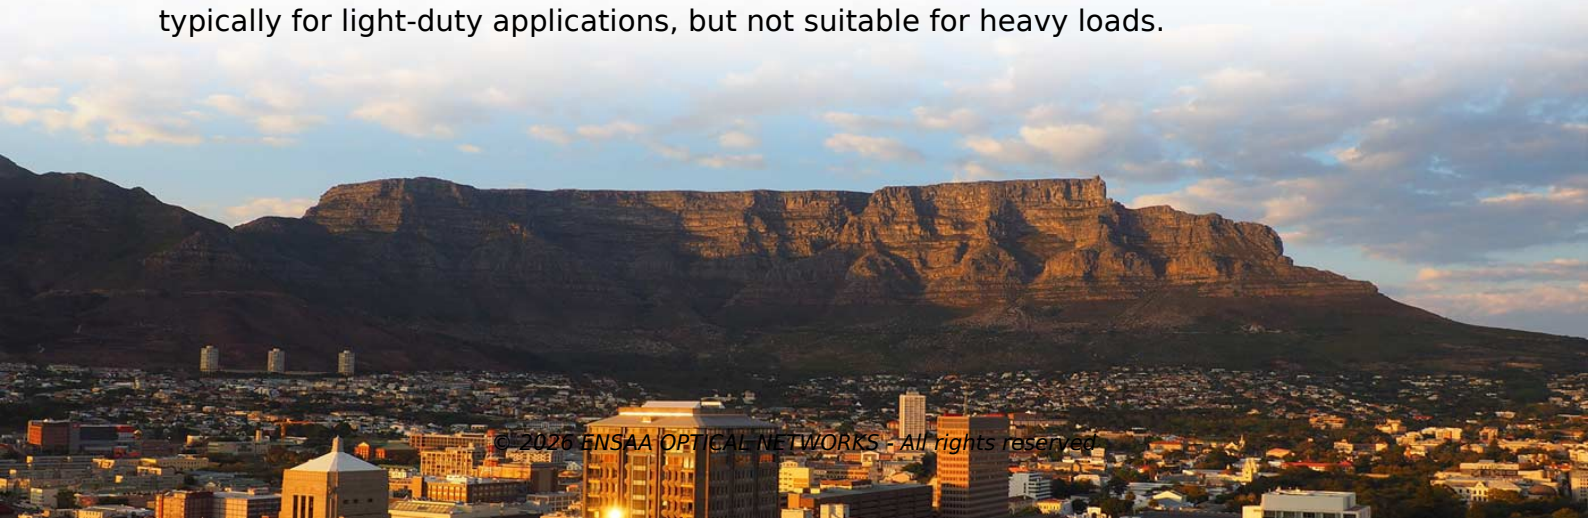

Price Overview

The cost of horizontal cable trays varies widely based on material, design, and supplier. Typical price ranges per meter are: Steel trays: \$5 to \$25 per meter, offering a balance of strength and affordability for general installations. Aluminum trays: \$6 to \$30 per meter, lightweight and corrosion-resistant, ideal for outdoor or industrial environments.

Stainless steel trays: Most durable and corrosion-resistant, suitable for heavy-duty or harsh environments, generally at the higher end of the price spectrum.

FR

P (Fiberglass Reinforced Plastic) trays: \$10 to \$50 per meter, used in aggressive environments where chemical resistance is critical. Plastic trays: Budget-friendly, typically for light-duty applications, but not suitable for heavy loads.

Factors Affecting Price

Tray Type: Ladder trays are more expensive but support heavier cables, while wire mesh or perforated trays are cheaper and suitable for lighter loads. **Surface Treatment:** Hot-dip galvanizing (HDG) and powder coatings increase durability and cost, whereas pre-galvanized trays are less expensive. **Size and Dimensions:** Wider or thicker trays require more material, increasing the price.

Order Quantity: Bulk orders can reduce per-meter costs by 20–40%. **Installation Complexity:** Labor, supports, connectors, and site conditions can add to the total cost. **Retail vs.**

Bulk Pricing
B2C (Retail): Small-scale consumer trays, such as under-desk organizers, range from \$15 to \$34 per unit, with wholesale prices as low as \$0. 92.

B2

B (Bulk/Industrial): Prices can range from \$0. 80 to over \$76 per meter depending on material, volume, and supplier, with potential cost savings for large projects.

Cost-

Saving Tips

Opt for perforated trays instead of ladder trays if weight is not a concern, saving up to 15%. Consider importing from regions like China for bulk orders, which can reduce costs by 30–50%. Plan for installation efficiency, as cable trays are faster to install than conduit systems, potentially saving 40–60% of total project labor costs.

Overall, the current market for horizontal cable trays offers a wide range of options, allowing buyers to balance durability, material, and budget according to project requirements.
