

Price of Portuguese Mesh Cable Trays

Overview

Cable Tray | Catalogue | GroupSumiln our catalogue, you can easily compare the cable trays that suit your needs and budget. We offer affordable and durable.

Key Takeaways

Portuguese wire mesh cable trays typically cost between \$800 and \$2,500 per ton, depending on material, size, and supplier factors.

Price Range and Influencing Factors

The cost of wire mesh cable trays in Portugal generally ranges from \$800 to \$2,500 per ton. This variation is influenced by several key factors: Material and wire gauge: Steel, stainless steel, or galvanized finishes affect durability and price. Thicker wires and higher-grade steel increase costs.

Surface coatings: Zinc or other protective coatings add to the price but improve corrosion resistance. Tray dimensions and design: Larger trays or custom shapes require more material and labor, raising costs. Order volume: Bulk purchases often reduce the per-ton cost.

Supplier location and market demand: Local production versus imports, and fluctuations in raw material prices, can impact pricing.

Suppliers and Market Context

Portugal has several reputable manufacturers and suppliers of mesh cable trays, including Jeetmull Jaichandlall (P) Ltd., which offers customizable sizes, shapes, and finishes tailored to industrial, commercial, and construction applications.

Other B2

B suppliers, such as PSAPLAST and LIZTHERM, provide mesh cable trays and related accessories nationwide. The Portuguese cable tray market is moderately growing, driven by infrastructure modernization, renewable energy projects, and industrial automation. Both domestic fabricators and international suppliers operate in the market, with product quality, compliance with safety standards, and installation expertise being key differentiators.

Additional Considerations

Installation costs: While mesh trays are relatively easy to install, labor and mounting hardware can add to the total project cost. **Durability and lifespan:** Wire mesh trays are cost-effective over time due to their strength, ventilation, and resistance to wear. **Customization:** Special sizes, coatings, or configurations may increase the price but provide better fit and performance for specific projects.

In summary, for budgeting purposes, expect \$800–\$2,500 per ton for Portuguese mesh cable trays, with final costs depending on material, size, supplier, and project-specific requirements.
