Price of Split-Type Network Cabinets

Overview

Learn the 2025 price range, load capacity, sizes, and material options for network cabinets. Compare 42U, 45U, 19-inch racks, and get wholesale factory pricing, OEM service, and full specifications.

Key Takeaways

Split-type network cabinets typically range from $300 to $1,200 depending on size, features, and configuration. OverviewSplit-type network cabinets are modular enclosures designed to house networking equipment such as switches, routers, patch panels, and servers. They are often used in environments where equipment needs to be separated into multiple sections for better airflow, security, or organization.

These cabinets follow standard 19-inch rack-mount widths and can be wall-mounted or floor-standing, depending on space and load requirements.

Pricing

Small Wall-

Mount Cabinets (6U–12U): Ideal for home offices or small retail setups, these cabinets start around $100 for basic models and can go up to $260 for units with glass doors and enhanced security features.

Floor-

Standing Cabinets (12U–27U): Suitable for larger offices or server rooms, these cabinets range from $300 to $800, offering better ventilation, easier access, and higher load capacity.

High-

End or Custom Split-Type Cabinets: For enterprise or data center applications, modular split-type cabinets with advanced cooling, security systems, and cable management can cost $1,000 to $1,200 or more, depending on configuration and optional features such as extinguishing systems or electronic locks.

Features Affecting Price

Material: Cold-rolled steel or reinforced aluminum increases durability and cost. Doors and Panels: Lockable glass doors, removable side panels, and front/rear access add to the price. Cooling and Ventilation: Integrated fan mounts, airflow management, and dust protection can increase cost.

Security Options: Electronic locks, fire suppression systems, and monitoring capabilities are available for higher-end models. Customization: Modular split-type designs allow for flexible sizing and internal layout, which can affect pricing.

Conclusion

The cost of split-type network cabinets varies widely based on size, features, and intended use. For small setups, expect $100–$260, while larger or enterprise-grade split-type cabinets can range from $300 to over $1,200. Choosing the right cabinet depends on your equipment, space, and security requirements.
