

Price of a single-hole fiber optic panel

Overview

FS offers FHD® FAPs and FHU™ 1U fiber patch panel with LC, SC, MTP®/MPO connectors in singlemode/multimode fiber to deploy medium for high-density fiber optic network applications.

Key Takeaways

Fiber optic patch panels typically range from \$30 for basic empty panels to over \$500 for pre-terminated, high-density modules.

Price Overview

Basic Empty Panels: Simple 1U or 2U fiber optic panels without adapters or pre-terminated cables generally cost \$30-\$100 depending on size and brand (FiberTek, Amazon). Panels with Adapters: Panels pre-fitted with LC, SC, or ST adapters usually range from \$80-\$200, offering ready-to-use ports for fiber termination (Foss, FS).

Pre-

Terminated Panels: Factory-installed pigtails or complete pre-terminated cable assemblies can cost \$150-\$500+, depending on fiber type, connector type, and port density (Foss FP PRO-series, FPM76 modules).

Factors Affecting Price

Connector Type: LC, SC, ST, or MTP/MPO connectors influence cost, with MTP/MPO typically being more expensive due to higher density and complexity. Fiber Type: Singlemode (9/125 μm) panels are generally slightly more expensive than multimode (OM1-OM4) panels. Panel Capacity: Higher port density panels (e.g., 24-288 fibers per frame) increase the price, especially for modular or expandable designs.

Customization: Panels with factory-installed pigtails, pre-terminated cables, or specialized indoor/outdoor cables cost more than empty or adapter-only panels.

Buying Tips

For budget installations, empty panels or adapter-only panels are cost-effective and allow field termination. For high-density or turnkey solutions, pre-terminated panels save installation time and reduce errors but come at a higher price. Always check compatibility with your existing rack, fiber type, and connector standard before purchasing.

In summary, fiber optic hole panels are available across a wide price spectrum, from \$30 for basic empty panels to \$500+ for high-density, pre-terminated solutions, with costs influenced by connector type, fiber type, and panel capacity.
