

Price of optical fiber cable bundles

Overview

Fiber Bundles – Buyer's Guide & Supplier List | RP This buyer's guide for fiber bundles provides technical background, comparison of major types, selection.

Key Takeaways

The cost of a whole bundle of optical fiber cable varies widely, typically ranging from \$0.09 to \$6 per foot depending on fiber type, strand count, and cable construction.

Pricing Overview

Wholesale bulk purchases of fiber optic cable can cost \$0.09 to \$1.52 per foot, while retail prices range from \$1 to \$6 per foot.

Single-mode fiber is generally cheaper per foot (\$0.10–\$0.50) than multimode fiber (\$0.

30–\$1.00), but single-mode requires more expensive equipment for installation. High strand-count cables increase the price: a 12-strand cable may cost around \$0.

50 per foot, while a 24-strand cable can reach \$1.00 per foot. Specialized cables, such as armored or plenum-rated cables, can cost \$0.

50 to \$5 per foot depending on durability and installation environment.

Bulk Roll Options

Many suppliers offer 1000-foot rolls or larger bundles for professional installations. Buying in bulk often provides discounts, making it more cost-effective for large projects. Pre-terminated assemblies or patch cables are more expensive due to factory termination and connector types.

Factors Affecting Total Bundle Cost

Fiber Type: Single-mode vs multimode affects both price and performance. **Strand Count:** More fibers per bundle increase cost proportionally. **Cable Construction:** Indoor riser-rated, plenum-rated, or armored cables have different price points.

Length of Cable: Longer bundles naturally cost more, but bulk pricing reduces per-foot cost. **Installation Environment:** Underground or harsh environments may require specialized cables, increasing cost.

Example Estimate

A 1000-foot roll of 12-strand single-mode fiber could cost approximately \$90–\$500 depending on construction and supplier. A 1000-foot roll of 288-strand multimode fiber for backbone applications could reach \$2,880–\$6,000. In summary, the price of a whole bundle of optical fiber cable depends on fiber type, strand count, cable length, and construction, with bulk purchases offering significant savings for large-scale installations.
