

Price of small mesh enclosures for network cabinets

Overview

Amazon.com: Network EnclosureDiscover structured media enclosures and server cabinets for home and business networking needs. Available in multiple configu.

Key Takeaways

Small mesh or ventilated network cabinets typically range from \$100 to \$300 depending on size, features, and brand.

Overview

Small mesh enclosures are designed to house networking equipment such as switches, routers, patch panels, and small servers while providing ventilation and airflow to prevent overheating. They are commonly wall-mounted or compact floor-standing units and often include locking doors or removable side panels for security and maintenance access. Price RangeEntry-level small enclosures (6U-9U, wall-mount, basic mesh or perforated doors) generally cost \$100-\$200.

These are suitable for home offices or small IT setups. Mid-range enclosures with enhanced features such as locking doors, deeper racks, or higher load capacity can range from \$200-\$300. High-end or specialized mesh cabinets for professional or industrial use may exceed \$300, especially if they include heavy-duty construction, integrated cable management, or advanced airflow design.

Features Affecting Price

Size and Rack Units (U) – Larger cabinets with more rack space cost more. Material and Build – Steel mesh or perforated metal is more expensive than plastic or ABS enclosures. Security – Lockable doors and side panels increase cost.

Mounting Type – Wall-mounted units are usually cheaper than free-standing floor racks. Additional Features – Cable management rails, fan mounts, and removable panels can add to the price.

Where to Buy

Amazon offers small wall-mount network cabinets starting around \$120-\$250 depending on size and features.

RS

P Supply and Graybar provide professional-grade cabinets with mesh or perforated doors, typically in the \$150-\$300 range. Home Depot and Lowe's carry smaller plastic or ventilated enclosures for home networking, often priced \$40-\$150 for compact units. In summary, for a small mesh network cabinet, expect to pay \$100-\$300, with the final price depending on size, material, security, and additional features.
