Qatar High-Voltage Distribution Box

Overview

Our wide range of switchgear offering for critical applications are available in power generation, distribution, control, protection and final consumption.

Key Takeaways

High-voltage distribution boxes in Qatar can be purchased from suppliers like Ubuy, Alsiraj Qatar, Electra Qatar, and Polar Qatar, offering both wall-mounted and mobile options for industrial and construction use. Supplier Options1. Ubuy Qatar Ubuy offers 110V high-current wall-mounted distribution boxes suitable for construction sites, workshops, and factories.

These boxes feature an IP54 rating for dust and water protection, 80A leakage circuit breaker, and multiple circuit breakers for safety. They are easy to install with pre-wired interiors and portable for flexible use. Products can be ordered online directly from Ubuy Qatar for delivery within the country.

2. Alsiraj Qatar Alsiraj provides a wide range of DELTA, STROBL, and ANIF series distribution boxes, suitable for both indoor and outdoor applications. Their enclosures are made from PC/ABS material, certified to IEC/EN 62208 standards, offering high impact resistance, thermal stability, UV and chemical resistance.

They also provide mobile thermoplastic distribution boxes that can be customized and optimally equipped for industrial, agricultural, or commercial use. 3. Electra Qatar Electra supplies distribution point boxes made from self-extinguishing polystyrene, designed for indoor use with IP30 protection.

They offer fully assembled units with modular installation parts and provide installation services anywhere in Qatar. Electra ensures products meet international standards and offers expert guidance for selection and setup. 4.

Polar Qatar Polar Qatar specializes in custom LV panels, metal enclosures, SMDB, DB, and UPS stabilizer systems. They supply and install distribution boxes for industrial and government projects, offering custom sheet metal enclosures and full electrical solutions including circuit breakers, transformers, and earthing systems. Polar Qatar works with top brands like Schneider, ABB, and Eaton, providing both products and on-site installation services.

Considerations When Purchasing

Indoor vs. Outdoor Use: Ensure the IP rating matches your environment (e.g., IP54 for outdoor, IP30 for indoor). Current Capacity: Check the maximum current rating (e.g., 80A for Ubuy boxes).

Customization: Some suppliers like Alsiraj and Polar offer tailored solutions for specific industrial needs. Installation Services: Electra and Polar provide on-site installation, which can be crucial for high-voltage setups. Compliance: Verify that the boxes meet local and international standards for safety and electrical performance.

These suppliers provide a range of options for high-voltage distribution boxes in Qatar, from ready-to-use wall-mounted units to fully customized industrial panels.
