Routers running at full gigabit fiber optic speeds

Overview

If you're looking for the best fiber routers for gigabit speeds in 2026, I recommend considering options like WiFi 6E, WiFi 6, and WiFi 7 models from brands like TP-Link, NETGEAR, Gryphon, and GL. Fiber internet delivers the fastest speeds — up to 5Gbps. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price tag. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Your fiber optic connection delivers symmetrical multi-gig speeds at the ONT, but a bottleneck router turns that promise into buffer wheels and lag spikes. The right router doesn't just pass traffic — it preserves the low-latency, high-bandwidth nature of fiber from the WAN port to every wireless. Powered by the latest WiFi 7 (802. 11be) technology and a quad-core 2.
