

Saudi Arabian steel cable tray company

Overview

Cable Trays We at Integrated Steel hold a pan-Saudi Arabia presence to supply cable trays of the highest industrial standards...

Key Takeaways

Top steel cable tray suppliers in Saudi Arabia include Hitech Fence, Al Fareed Stars, Wescosa, Integrated Steel Plant, and Zawaya Tayeba, offering durable, standards-compliant solutions for industrial and commercial projects.

Leading Suppliers and Their Offerings

Hitech Fence provides robust cable tray systems designed for heavy power and control cable runs, suitable for industrial plants, substations, and large MEP projects. Their trays are available in GI, hot-dip galvanized, and powder-coated finishes, ensuring long-term durability in harsh desert and coastal environments. They emphasize flexible routing, minimal maintenance, and faster installation compared to traditional conduit systems.

Al Fareed Stars is a trusted Saudi manufacturer offering ladder, perforated, wire mesh, and custom cable trays. Their products are ISO 9001 certified and widely used by government ministries and major contractors. They also provide steel boxes, trunking, and cable support accessories, ensuring a complete cable management solution.

Wescosa manufactures cable trays in aluminum alloy, hot-dip galvanized steel, stainless steel 304 & 316L, and fiberglass, adhering to NEMA and IEC 61537 standards.

Their WESLADDER and WESTRAY

S systems are engineered for high structural integrity, heavy loads, and ease of cable pulling. They offer a variety of tray profiles, widths, heights, and lengths, suitable for power plants, oil refineries, and industrial construction sites. Integrated Steel Plant supplies a wide range of cable trays including powder-coated, stainless steel, ladder, trunking, galvanized, perforated, and hot-dip galvanized trays.

Their manufacturing process follows ISO 9001: 2015 certification, with rigorous testing for tensile strength, dimensional accuracy, and hardness, ensuring high-quality products for diverse industrial applications. Zawaya Tayeba specializes in perforated and solid-bottom trays, heavy-duty ladders, and fully enclosed trunking. They provide a complete range of accessories such as brackets, bends, risers, and tees, with nationwide delivery and technical support for project-specific requirements.

Key Considerations for Choosing Steel Cable Trays

Material and Coating: Hot-dip galvanized or powder-coated steel for corrosion resistance in desert or coastal environments. Stainless steel 304/316L for chemical or high-humidity areas. **Tray Type:** Ladder trays for heavy power cables, perforated trays for ventilation, wire mesh for flexible routing, and trunking for enclosed protection.

Standards Compliance: Ensure trays meet NEMA, IEC 61537, and ISO 9001 certifications for safety and reliability. **Load Capacity and Dimensions:** Select trays with appropriate rung spacing, width, and depth to support cable weight and future expansion. **Installation and Maintenance:** Consider suppliers offering modular systems, easy rerouting, and minimal maintenance for long-term cost efficiency.

For industrial, commercial, or government projects in Saudi Arabia, these suppliers provide high-quality, durable, and customizable steel cable tray solutions suitable for extreme temperatures, UV exposure, and heavy-duty applications.
