Single-row rack micro-modular data center solution

Overview

Preferred choice for small- and medium-sized DCs, integrating power supply and distribution, cooling, rack, contained aisle, and monitoring systems to realize one DC per module. Discover Smart Micro Modular Data Center Solutions with One Row One DC, offering scalable, efficient, and flexible power. Delta InfraSuite is a new generation, highly integrated modular datacenter solution. It uses racks as the datacenter carrier and fully integrates all sub-systems including UPSs, cooling, power distribution, lightning protection, fire control (optional), wiring, airflow management, intelligent. EcoStruxure Data Center Solutions bring together power, cooling, racks, and management systems to support deployment of IT equipment in all environments from small Edge applications to large Cloud data centers. With a fully modular architecture, it can be flexibly configured.
