

South African cable tray supply

Overview

Order your standard stock online, submit your bending schedule for a custom supply quote, or collect directly from one of our branches. Cable trays are more than just a cable management system; they are an essential component for any robust and secure electrical. Cable trays are a type of cable management system used to support and organize electrical cables and wires in commercial, industrial, and residential settings. They are typically made of metal, such as steel or aluminum, and are designed to provide a safe and efficient way to route and protect. Three major types of cable trays are wire-mesh (Basket Tray), Perforated Cable Trays, and Return Flange Cable trays. Wire mesh cable trays are commonly used in server rooms and data centers both on the surface as well as under the raised flooring to manage the cables. If you require a Cable Tray.
