

# Suriname Bou-Wave Multiplexer Manufacturers

## Overview

The leading manufacturers of Multiplexers are listed here. See their profiles, products and news on everything RF. Narrow down by location and certification.

## Key Takeaways

While no specific Bou-Wave multiplexer manufacturers are publicly listed in Suriname, companies certified under the Blue Wave Supplier Development Program are the most likely candidates for sourcing such equipment.

## Blue Wave Supplier Development Program

The Blue Wave Supplier Development Program, initiated by Staatsolie Maatschappij Suriname N. V. and supported by Chevron, TotalEnergies, QatarEnergy, and PetroChina, trains and certifies local small to medium-sized enterprises (SMEs) to meet international standards for supplying the offshore oil and gas industry. The program focuses on areas such as technical capabilities, quality, Health, Safety, Security & Environment (HSSE), and compliance, which are critical for companies providing complex equipment like multiplexers.

## Potential Suppliers

Although the program does not publicly list all companies by product type, participants include firms with technical and industrial expertise. For example, companies like Gopex International and RFH Agencies have completed the program and demonstrated readiness to supply technical equipment and services. These companies may either manufacture or distribute specialized equipment, including multiplexers, for offshore and industrial applications.

### **How to Identify Manufacturers**

**Contact Blue Wave Program Administrators:** They maintain a database of certified companies and can provide guidance on which participants have capabilities in electronics, telecommunications, or industrial multiplexing equipment. **Engage with Certified Companies:** Companies that have completed the program have access to international standards and certifications, making them suitable candidates for supplying Bou-Wave multiplexers. **Market Research Reports:** Reports like the Suriname Multiplexers Market (2025-2031) provide insights into local market trends and potential suppliers, which can help identify companies involved in multiplexer distribution or manufacturing.

### **Recommendation**

For sourcing Bou-Wave multiplexers in Suriname, the most effective approach is to reach out to Blue Wave-certified companies and inquire about their capabilities in telecommunications or industrial multiplexing. This ensures that suppliers meet international quality and safety standards and are prepared to support offshore or industrial projects.
