Universal Cable Tray Support

Overview

Cable Tray Accessories | PohlCon – Partner from start Cable support systems - Complete catalogue Catalogue for cable trays, mesh cable trays, cable ladders.

Key Takeaways

Universal cable tray supports are versatile brackets and hangers designed to securely hold cable trays in various configurations, suitable for ceilings, walls, floors, and industrial structures.

Overview

Universal cable tray supports are essential components in cable management systems, providing mechanical support for cable trays, ladders, and mesh trays. They ensure safe routing of electrical, instrumentation, and communication cables while maintaining compliance with standards such as IEC 61537 and DIN EN 61537. These supports are used in commercial, industrial, and offshore installations, offering flexibility for horizontal, vertical, and multi-level cable routing.

Types of SupportsWall-Mounted Supports: Brackets fixed to walls to hold cable trays horizontally or at an angle. They are ideal for tight spaces and vertical cable runs. Ceiling or Roof Hangers: U-profile or C-profile hangers suspended from ceilings or roof structures, supporting long horizontal tray runs.

Floor-

Mounted Supports: Used for cable trays running along floors, often in workshops or industrial plants. Cantilever and Unistrut Systems: Extendable supports for heavy-duty trays or complex routing, allowing modular adjustments. Adjustable or Universal Brackets: Designed to accommodate different tray widths and heights, providing flexibility for future modifications.

Materials and Coatings

Universal supports are manufactured from steel, stainless steel, aluminum, or GRP (glass-fiber reinforced polyester). Coatings and finishes include: Hot-dip galvanization for corrosion resistanceEpoxy coatings for chemical and environmental protectionStainless steel for high durability in harsh environments These materials ensure long-term performance, even in humid, offshore, or industrial conditions.

Accessories and Fittings

Supports are complemented by a range of accessories: Clamps, couplers, tees, and crosses for directional changesEnd closures and reducers for tray terminationsCable tray hangers and brackets for secure attachment to structures These accessories allow for modular, flexible, and safe installation, accommodating different cable types and load requirements.

Applications

Universal cable tray supports are widely used in: Industrial plants and factoriesCommercial buildings, offices, and shopping centersOffshore and marine installationsData centers and communication hubs They provide efficient cable organization, reduce installation time, and enhance safety by preventing cable sagging, entanglement, or damage. Standards and ComplianceHigh-quality supports comply with IEC 61537, ensuring mechanical strength, corrosion resistance, and compatibility with various cable tray systems. Proper selection of support type, material, and coating is critical to meet load requirements and environmental conditions.

In summary, universal cable tray supports offer a flexible, durable, and standardized solution for supporting cable trays in diverse installation scenarios, ensuring safety, reliability, and ease of maintenance.
