

Vietnam Galvanized Cable Trays Full Range of Specifications Available

Overview

It provides a safe and organized way to route and protect cables, while also allowing for easy access and maintenance.

Key Takeaways

Galvanized cable trays in Vietnam are primarily made from hot-dip or electro-galvanized steel, with thicknesses ranging from 1.5 mm to 2.5 mm, widths from 50 mm to 900 mm, and lengths of 2.

4–6 meters, designed for durability, corrosion resistance, and efficient cable management.

Material and Coating

Galvanized cable trays are typically manufactured from Q235 carbon steel or high-grade steel sheets, coated with a zinc layer through hot-dip galvanization or electro-galvanization. Hot-dip galvanized trays require a minimum thickness of 1.5 mm, while electro-galvanized trays may start from 1.

0 mm. The zinc coating provides excellent corrosion resistance, making these trays suitable for harsh industrial environments, including power plants, data centers, and commercial buildings.

Dimensions

Width: 50 mm to 900 mm Height: 50 mm to 150 mm Length: Standard lengths are 2.4–2.5 m, with some manufacturers offering 3 m and 6 m options.

Thickness: 1.0–2.5 mm, with hot-dip galvanized trays requiring at least 1.5 mm.

Design Features

Perforated or solid bottoms: Perforated designs allow ventilation and prevent cable overheating, while solid bottoms provide additional protection. Open-top or ladder-type structures: Facilitate easy cable installation and maintenance. Closed sides: Enhance structural integrity and cable support.

Applications

Galvanized cable trays are used to support and manage power and control cables in various settings, including: Industrial workshops and factories Commercial buildings and shopping malls Oil and gas facilities Hospitals and data centers They provide a safe, organized, and accessible cable routing system, reducing installation time and maintenance costs.

Additional Specifications

Load capacity: Designed to support heavy cable loads depending on width, height, and material thickness. Customization: Available in various colors, sizes, and configurations to meet specific project requirements. Compliance: Many manufacturers in Vietnam provide trays that meet ISO, CE, and SGS certifications.

Galvanized cable trays in Vietnam combine durability, corrosion resistance, and ease of installation, making them a reliable choice for both industrial and commercial electrical infrastructure projects.
