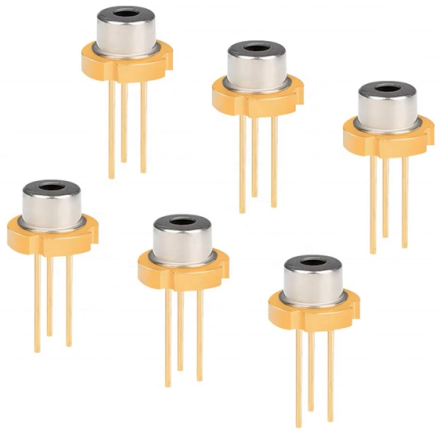
Well-known Spanish low-voltage switchgear complete sets of equipment



Overview

Pine manufactures Low Voltage switchboards and Medium Voltage switchgears with a wide range of voltages, currents and breaking capacities.

Key Takeaways

CEN Solutions, Pine, Telergon, and ABB are among the leading Spanish manufacturers of low-voltage switchgear complete sets of equipment.

CE

N SolutionsCEN Solutions specializes in low-voltage switchboards for distribution and motor control centers, certified according to IEC61439-1 and IEC61641 standards. Their products are designed for critical power supply applications in datacenters, oil & gas, and power generation. They offer customized solutions integrating any electrical switchgear, including protection relays, with testing and functional verification performed by their own personnel.

Their equipment is optimized for Industry 4. 0, enabling remote monitoring, data collection, and communication capabilities.

Pine

Pine has over 45 years of experience in designing and manufacturing low-voltage switchboards and medium-voltage switchgears. Their products cover a wide range of voltages, currents, and breaking capacities. Pine emphasizes robust metal sheet design and adaptability to client-specific wiring needs.

Their low-voltage switchboards are available in fixed, compartmentalized, and withdrawable executions, and are installed in more than 35 countries worldwide. Pine also provides control units, automation boxes, and consoles for industrial and commercial applications.

Telergon

Telergon focuses on low-voltage switching and protection solutions, including load break switches, automatic switches, differential switches, and magnetothermic switches. They offer changeover and switch-disconnector solutions essential for power control, sectioning, and protection. Telergon collaborates with international partners to provide innovative and reliable solutions tailored to customer needs, particularly for DC applications, photovoltaic installations, and energy storage systems.

AB

B SpainABB provides a comprehensive range of low-voltage switchgear designed for industrial, commercial, and infrastructure applications. Their solutions include smart switchgear for building automation, transfer switching systems, and upgradeable low-voltage distribution systems.

AB

B emphasizes digital integration, energy efficiency, and operational safety, offering products that support remote monitoring, predictive maintenance, and Industry 4. 0 connectivity. Their equipment is widely used in sectors such as automotive manufacturing, renewable energy, and industrial automation.

Summary

These Spanish manufacturers are recognized for their high-quality, certified low-voltage switchgear, offering complete sets of equipment for distribution, motor control, and automation applications. They provide customization, compliance with international standards, and integration with modern digital systems, making them suitable for both industrial and critical infrastructure projects.
