

Wholesale price of optical module pull ring

Overview

Professional manufacturer of QSFP transceiver stainless steel bail assembly with blue plastic pull loop.

Key Takeaways

Wholesale prices for optical module pull rings typically start at a few dollars per unit, depending on material, quantity, and customization.

Pricing Overview

Optical module pull rings are available from multiple manufacturers and suppliers, with pricing influenced by material (zinc alloy, aluminum, or steel), surface finish, and order volume. For example, Shenzhen Aoli Casting Hardware Products Co., Ltd offers competitive pricing for bulk orders and can provide quotes within 3 days after receiving 2D/3D drawings or samples, with tolerances as precise as $\pm 0.05\text{mm}$ and small orders also accepted (prices vary based on specifications).

Alibaba suppliers list customized SFP+ pull rings with wholesale terms, typically requiring 30% deposit and 70% before delivery, and delivery within 5-7 working days after payment. These suppliers also provide technical support and warranty for 12 months, ensuring quality for bulk purchases.

Factors Affecting Wholesale Price

Material: Zinc alloy, aluminum, or stainless steel options affect cost. **Quantity:** Larger orders reduce per-unit cost. **Customization:** Special finishes, tolerances, or branding may increase price.

Supplier Location: Shipping from China or other countries may add to total cost.

Payment Terms: Prepayment or negotiated terms can influence pricing.

Procurement Tips

Provide detailed 2D/3D drawings to get accurate quotes. Confirm material and surface finish requirements. Negotiate shipping and delivery terms for bulk orders.

Consider suppliers with ISO certifications for quality assurance. In general, wholesale optical module pull rings are priced affordably for bulk orders, often ranging from \$1 to \$5 per unit depending on specifications, with exact pricing available upon request from manufacturers or verified wholesale platforms like Alibaba and Global Sources.
