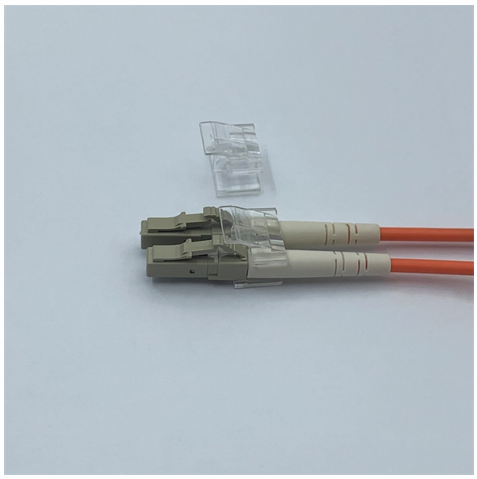
Xin an Trough-Type Cable Tray Price Inquiry



Overview

Trough Cable Tray Price, 2026 Trough Cable Tray Price Factory direct options come straight from the manufacturer, ensuring competitive pricing and availabl.

Key Takeaways

The cost of a Xin'an trough-type cable tray typically ranges from $10 to $50 per meter, depending on material, size, and finish.

Price Range and Material Factors

The price of trough-type cable trays varies significantly based on the material used. Steel trays are generally the most common and cost between $10 and $30 per meter, offering a balance of durability and affordability. Aluminum trays are lightweight and corrosion-resistant, costing around $20 to $50 per meter.

Stainless steel trays are the most expensive, suitable for harsh or hygienic environments, and may exceed $50 per meter.

Plastic or FR

P trays are budget-friendly but less suitable for heavy loads or high-temperature applications.

Coating and Finish

Coatings affect both durability and price. Hot-dip galvanized (HDG) trays are more expensive but provide superior corrosion resistance, ideal for outdoor or industrial settings. Powder-coated trays offer wear protection and color options, while pre-galvanized trays are cheaper but less durable in corrosive environments.

Bulk Orders and OEM Options

Purchasing in bulk or directly from manufacturers like Xin'an can reduce costs. Many suppliers offer OEM or customized options, which may include specific dimensions, perforation patterns, or load capacities. Factory-direct purchases often provide competitive pricing and volume discounts.

Total Cost Considerations

The initial price per meter is only part of the total cost. Installation labor, fittings, supports, and maintenance can significantly impact the overall budget. Trough-type trays are generally easier to install than conduit systems, potentially saving 40–60% on labor costs over traditional piping.

Choosing the right material and finish for the environment can also reduce long-term maintenance expenses.

Summary

For a Xin'an trough-type cable tray, expect $10–$50 per meter, with steel being the most economical, aluminum mid-range, and stainless steel the highest. Consider bulk purchasing, material selection, and installation factors to optimize both upfront and lifecycle costs.
